

# Document Title: Version Control of Study Documents

Document Number: PTUC SOP060

<b>Staff involved in development:</b> <i>Job titles only</i>	Senior R&D Manager, R&D Operational Manager, Clinical Project Managers
<b>Document author/owner:</b>	Senior R&D Manager
<b>Directorate:</b>	Research and Development
<b>Department:</b>	Research and Development
<b>For use by:</b>	NHS Staff Trust-Wide
<b>Review due:</b>	July 2022

**THIS IS A CONTROLLED DOCUMENT**

Whilst this document may be printed, the electronic version maintained on the Trust's Intranet is the controlled copy. Any printed copies of this document are not controlled. ©Royal Papworth Hospital NHS Foundation Trust. Not to be reproduced without written permission.

### Summary of Significant Change(s) (for this version only)

Section(s):	Modification:
	Minor administrative changes

### Key Points of this Document

- a. This document sets out the procedures to be followed by all Staff who are involved in the preparation of study documents for Royal Papworth sponsored research studies.
- b. It provides guidance on the correct use of version numbers in the production and finalisation of study documentation, so as to ensure compliance with the Trust's Information Governance Policies, the Data Protection Act (2000), and the UK Policy Framework for Health and Social Care Research (2018).

## **1 Purpose and Content**

- a. This document defines the Trust's procedures for the writing and preparation of study documents for use in Research Studies and Clinical Trials which are managed by Royal Papworth Trials Unit Collaboration (PTUC) or sponsored by Royal Papworth NHS Foundation Trust.
- b. The document clarifies the requirements for accurate version control of study documents produced for Royal Papworth sponsored research studies, as to comply with the requirements stated in section 6 of the Good Clinical Practice guidelines (GCP: 'a standard for the design, conduct, performance, monitoring, auditing, recording, analyses, and reporting of clinical trials that provides assurance that the data and reported results are credible and accurate, and that the rights, integrity, and confidentiality of trial subjects are protected').
- c. The document aims to provide clear guidance on how to produce correctly version controlled documentation and how these should be reviewed and updated.
- d. Version control is the process by which different drafts and versions of a document are dated and managed. It provides an audit trail for the drafting and updating of a finalised version of a document. Version control must be used when more than one version of a document exists, or when this is likely to be the case in the future.

## **2 Roles & Responsibilities**

- a. This Policy applies to all personnel that are involved in advising on, writing or reviewing documents for research studies managed by Royal Papworth Trials Unit Collaboration (PTUC) or sponsored by Royal Papworth NHS Foundation Trust.
- b. Staff preparing study documents must comply with the requirements set out in section 4.
- c. The Chief Investigator (CI) or Academic supervisor is responsible for the version control of the documents. They must notify the research team of any changes to version controlled documentation and ensure appropriate training is given, if required, following the new version.
- d. The CI or Academic supervisor must ensure that if they delegate the role of version control to another member of the research team, that they have sufficient knowledge and expertise.

### **3 Policy**

- a. This SOP is mandatory and, as per the Trust's Research Governance framework, non-compliance with may result in disciplinary procedures.

### **4 Procedure**

- a. During initial drafting each successive draft of a document must be numbered sequentially from 0.1, 0.2, 0.3... Once a finalised version is complete this should be titled Version 1.0.
- b. The version number and date should be on the header or footer of each page.
- c. Procedures should be in place to ensure that in addition to the completed version, each draft version of the document is saved and clearly identified by its file name.
- d. If version 1.0 is revised, drafts should be numbered as 1.1, 1.2... until version is completed. The finalised version should then be numbered 2.0 etc.
- e. A copy of each finalised version of a document should be included in the Trial Master File.
- f. Superseded versions must be clearly marked and archived appropriately.

### **5 Risk Management / Liability / Monitoring & Audit**

- a. The R&D SOP Committee will ensure that this SOP and any future changes to this document are adequately disseminated.
- b. The R&D Department will monitor adherence to this SOP via the routine audit and monitoring of individual clinical trials and the Trust's auditors will monitor this SOP as part of their audit of Research Governance. From time to time, the SOP may also be inspected by external regulatory agencies (e.g. Care Quality Commission, Medicines and Healthcare Regulatory Agency).
- c. In exceptional circumstances it might be necessary to deviate from this SOP for which written approval of the Senior R&D Manager should be gained before any action is taken. SOP deviations should be recorded including details of alternative procedures followed and filed in the Investigator and Sponsor Master File.
- d. The Research and Development Directorate is responsible for the ratification of this procedure.
