Dear Stephen and John

Just a short note to put on record thanks from across the region for your specific contribution over the last few weeks in hosting and supporting the CPRMC. I think it has been a really powerful demonstration of shared clinical problem solving and will be certainly incorporated into our planning of the next phase of the Response plan which we are currently working on with colleagues.

Your support in helping us set it up and giving it a home has been really important and underlines the really positive approach we have seen from the Trust during this period.

Please do pass on my thanks to your teams and to your board.

Best wishes

Ann

Ann Radmore
