Appendix 3: BAF Report

ID Manager	675 Screaton, Mrs Maura
Handler Opened	Randall, Ms Kathy 11/06/2014
Consequence (current) Likelihood (current)	Major - 4 Likely - 4
Risk level (current) Risk level (Target)	Extreme Risk High Risk
Rating (current)	16
Description	If we fail to ensure good Infection prevention and control practices then the Trust may fail to protect patients, staff and others from unnecessary harm from Hospital acquired infections such as MRSA, C. difficile & E coli Blood stream infection and fail to stay within ceiling trajectories for Healthcare Associated Infections. This could lead to illness, financial penalties and loss of reputation (SSI)
Controls in place	• Weekly in-patient ward meetings. • 6 weekly in-patient critical care meetings with review of all cases via Root Cause Analysis (RCAs). • Monthly reporting on hygiene code. • Monthly Directorate balanced scorecard. • Quarterly report to Cardiac Clinical Management Group. • Monthly reporting and monitoring through Infection Prevention & Control Committee • Avoidable Actions • Scrutiny panels for all C-Diff and MRSA • Microbiology clinical ward round in CCA twice a week • ED Environmental rounds • Infection Control Nurse ward rounds four times a week. • Managing lab results and advising on isolation precautions/treatment • Monitoring for trends pockets of increased infection and taking appropriate action • The hospital has a closed ventilated air system. Throughout our clinical areas the enhanced ventilation is tailored to meet the requirements of our patients. • SSI priority safety and quality focus for the Trust. • Harm reviews for all deep and organ space infections • Focus on essential IPC practices with increase in audits and improvement actions. • ED led environment rounds. • SSI stakeholder group. • deep cleaning programme for theatres • Peer review carried out by Mr Simon Kendall and recommendations being carried forward by IPC and SSI stakeholder groups • Ventilation safety group in place. • Water safety group continues. • 12/4/23 SSI stakeholder group meeting bimonthly chaired by CN/MD. • NICE guidance for prevention of SSI's in place • Reduced footfall and movement within operating theatres • Introduction of mini vac TNP for all patients at higher risk of infection. • Daily • MDT environment and clinical practise e.g. hand washing conduct on ward rounds. • NHSE/ICB external supportive review 12/6 and 13/6/2023. • Peer review of audit processes in theatre - actions being followed up through new governance structure. • 10/10/23 Recommendations and actions from NHSE in implementation phase - progress against actions reviewed at SSI stakeholder group. Updates on reviews due 13/2/24. • UKHSA SSI team prese
Risk Assessors recommended actions to further reduce the risk	Continued close monitoring and involvement of infection control team. Continue with RCA and scrutiny panel. RCA for MRSA bacteraemia and internal scrutiny panel. Update and review all infection control policies and procedures, including the over-arching policy DN15. DIPC has close oversight on all actions to gain assurance. Further external scrutiny requested e.g. external assessor and different approach to audits, external DIPC contacted to invite and review, theatre expert visit and opinion requested. Governance of SSI stepped up to allow greater assurance on actions and monitoring improvements. 10/10/23 Focused work on decolonisation treatment pre and post operatively, cleaning and decontamination audit actions and focus on resourcing diabetic care pre operatively. 11/12/23 Focus on environment L5 cleaning standards, theatre footfall and CC cleaning and decontamination in view of micro organism profiling. Complete 8/1/25 Air sensors placed in theatres as part of ventilation study. Meeting held with UKHSA re further support / advice. Review of data underway due 13/2/24 8/4/24 Ventilation study data now analysed and presentation due to be presented to the SSI clinical practise group by 30/4/24. Theatre footfall plan and standards agreed by theatre users. Specific actions in order to comply currently being implemented. Update on progress and audit of practise due to SSI clinical group 23/4/24. Pre operative decolonisation compliance has improved from 20% to 90% in March. 6/6/24 Compliance with IPC standards and practise demonstrates improvement. SSI rates remain circa 5% above UKHSA benchmark. SSI summit to be arranged for wider engagement and discussion. SSI summit held on 08 August 2024. 5/7/24 Numbers of CPE positive patients reducing. Elective activity paused until Monday 8th July 2024 to allow for cleaning. 8/8/24 No new cases of CPE identified since July 22nd indicating confidence in control measures. Control measures as above being regularly reviewed and adjusted.
Assurance	Mandatory IPC training for all staff. IPC policy, procedures and guidelines in place. IPCC committee meetings. Quality & Safety Management Group. CQC Outcome 8. Enhanced Surveillance scheme (MESS). Q&R Committee minutes. Audit high impact interventions as reported to the Commissioners. Recording all nosocomial infections in PIPR so that the Board has oversight. Review of all IPC National Guidance and ensure that we are compliant with these. The Trust has significant controls in place which are reported to the Board monthly and monitoring of all nosocomial infections has been added to Board reporting through PIPIR. SSI Governance has been revised to allow greater assurance on actions and monitoring improvements via SSI dashboard. Visit to Liverpool heart and chest hospital 5.9.23 and learning shared with SSI subgroups. This has now formed part of the SSI workplan. NHSE peer review of IPC measures undertaken in June 2023 and recommendations agreed. Numbers of positive CPE cases.
Gaps in Assurance	Measures are taken to manage any new and emerging infection risks however due to the evolving nature of these it is difficult to provide complete assurance that all mitigations are in place and this is kept under constant review.
Levels of Assurance (182) BAF risks - Does this risk have an	Adequate
action plan on Datix? (179)	Yes
Progress notes	[Screaton, Mrs Maura - 06/11/2024] Initial SSI rates for Q2 2.6% however are subject to change due to some late presentations. Review of actions following SSI summit underway with plan to present at Q and R on November 28th. Ventilation task and finish group August to Oct 2024 to act on audit of ventilation and further actions from SSI summit. This task group had wash up meeting on Nov 5th with outstanding actions being addressed through ventilation steering group. Enhanced CPE screening protocol supported by CDC on Nov 1st - implementation plan now being worked up. [Screaton, Mrs Maura - 13/12/2024] SSI rates for Q2 confirmed at 4.3%. So far Q3 rates < 3%. Compliance with standards continue to be monitored. This month focus on CCA environment.

Risk level (Target)	High Risk
Rating (current)	20
Description	IF the Trust fails to meet the constitutional reporting standards of RTT and cancer waiting targets THEN this could result in poor patient outcomes, poor patient experience, damage the Trust's reputation and reduce its income.
Controls in place	 All patients being prioritised for access based on the national priority codes rather than waiting time alone to ensure patients are safely managed while waiting. Review of waiting time on a weekly basis including the weekly PTL, daily review of IHU waits and Trust capacity. Remedial action plans are in place for all divisions to reduce the number of patients waiting over 40 weeks. The theatre transformation plan is delivering performance and productivity improvements with trajectory to return to 5.5 theatre model by September 23. (achieved as per plan) Harm reviews are in place and take place at 35 and 52 weeks. Action is now being taken to reduce patients above 40 week in line with national programme for recovery. These Patient Safety Initiatives (PSI) are focused on clearing +40 week waiting, these commenced on the 17/09 and will run for 3 months. 15.11.23 PSI lists now embedded within the divisions. Positive impacted on patients over 52 weeks and improvements in patients over 40 weeks. Dedicated operational support for cancer pathway. 14.02.24 PSI lists continue albeit at a slower rate that Q4 2023/24. 17.05.2024 Additional weekly scrutiny of waiting lists has been introduced, Chaired by the COO. Focus patients over 52 weeks and 40 weeks.
Risk Assessors recommended actions to further reduce the risk	Trust productivity improvement programme (Flow programme) proposed to deliver following in support of achieving reduced waiting lists: 1.Reduce length of stay and improve discharge profile. 2.Improved theatre utilisation. 3.Reduce DNAs. 4.Reduce overall waits, waiting list and longest waits. 5.Deliver capacity and demand analysis. 6.Support maintenance of diagnostic performance. 7.Deliver alternative models of care. 8.Improve cancer performance. 9.Improve day case utilisation. Actions will be reviewed by the Performance Committee on a monthly basis.
Assurance	IHU review and sign off daily by the COO and reported to the weekly senior operational oversight meeting. Recovery plan in place for Cancer waiting times with target trajectory which is monitored through the Trust Access meeting. Weekly PTL and Access meetings well established and oversee recovery plans. Additional, 40 week wait weekly meeting in place, focusing on 52 week waiters TCI dates, 40 week trends and developing plans to address. Use of PSI's to create additional capacity as and when required. 2nd line assurance vis monthly PIPR.
Gaps in Assurance	There are no gaps noted at present
Levels of Assurance (182)	Adequate
BAF risks - Does this risk have an action plan on Datix? (179)	Yes
Progress notes	[Speed, Jane - 01/11/2024] scheduled for additional radiologist. Elective activity continues to improve within the Surgical, Transplant, and Anaesthetic (STA) Division. since the opening of the 10 bedded nhanced Recovery Unit (ERU) in May 2024. Good progress continues with CT backlog recovery. Recovery plan to go to the Executive Director Committee meeing on 05 November 2024.

Consequence (current)	Major - 4
Likelihood (current)	Unlikely - 2
Risk level (current)	High Risk
Risk level (Target)	High Risk
Rating (current)	8
Description	If the trusts EPR is not being actively developed "Then" there is a strategic risk to the organisation as the EPR may not support corporate objectives, impacting productivity, clinical safety, benefits realization, and overall ambitions for data as part of the digital strategy "Ultimately" leading to loss of competitive advantage for the organisation and potential patient safety issues
Controls in place	a)Continue to utilise current EPR to support trusts strategy through clinical engagement and governance structures b)Assess EPR developments utilising a benefits methodology, to drive benefits from current system c)Identification of future options for EPR, assessment of capability of future state EPR to understand potential new benefits and any gaps within any new system d)Contract and relationship management of Dedalus, to maximise this relationship e) Soft market analysis to understand cost of change and cost of ownership of any new system f)Engage with ICS and central teams to understand funding available to RPH to enable any transition to ether another Dedalus EPR or an EPR from another provider
Risk Assessors recommended actions to further reduce the risk	1)Increased clinical engagement to deliver local optimization of the EPR where possible to avoid losing technological ground to mitigate risks, 2)Assess optimisations that do not require input from Dedalus or that can be delivered outside the core EPR 3)Deep dive into Orbis functionality to ensure it is fully ready for use in UK - especially in EPMA space (this looks furthest from being ready). 4)Look to drive competitive advantage through the partnership by shaping the anglicisation of Orbis in specialty areas 5)Further indepth report and risk list for remaining on Lorenzo till end of current contract.
Assurance	a)Clinical safety case and ongoing work of Digital Clinical safety meeting which reports to QRMG b)Digital governance structures and groups which give strategic oversight on EPR c)Contract meetings with Dedalus to escalate EPR concerns, risks and develop plans to mitigate/manage these risks d)Partnership agreement and first of type offer from Dedalus that they will cover much of the RPH costs for migration to Orbis e)Soft intelligence regarding frontline digitisation funding to give open options to organisation of EPR, agreement from central team to downgrade RPH from class 3 not applicable for funding to level 2 which would allow some funding (approx. £6m), this funding is not certain and would require ICS support f)Review of the Orbis evaluation by Gartner and HIC both suggested the methodology of assessment was sound and concurred with initial recommendations that Orbis looked like a system that would fit in the financially envelope and deliver a usable system.
Gaps in Assurance	Dedalus decision to stop development of Lorenzo Clinical, Anglicization gap for Orbis, is it ready for UK market
Levels of Assurance (182)	Adequate
BAF risks - Does this risk have an action plan on Datix? (179)	Yes
Progress notes	[Page, Mr Simon - 22/11/2024] No change [Page, Mr Simon - 21/10/2024] Revised the risk narrative separating out "current system not being developed" and removing "timeline to replacement is not clear" this is due to OBC approval and full progress to procurement and FBC delivery.

Description	"IF" the trust is underprepared for a cyber-attack and/or lacks cyber resilience "THEN" the risk of a major cyber event increases. "ULTIMATELY" This event could cause data loss across key systems (clinical and non-clinical), and disruption at not only an organisation level but regional and national level. The impact may last for a prolonged period, necessitating cancellations and delays to treatment. Additionally, it poses a risk to the Trust's reputation, in the patient care that can be given and in rare cases even loss of life.

Risk level (current)	Extreme Risk
Risk level (Target)	High Risk
Rating (current)	15
Description	If turnover does not reduce and remain at or below target level then the Trust will lose key skills and reduce the levels of experience in the workforce, incur additional costs in the form of recruitment costs and temporary staffing spend, see a reduction in staff engagement and satisfaction and be unable to maintain safe staffing levels and achieve activity levels.
	The Compassionate and Collective Leadership Programme is the vehicle for reducing turnover through improving staff engagement and building a positive and compassionate culture. The programme focuses on leadership, EDI, health and wellbeing and staff development. In July 21 we launched the Trust's revised values and behaviour framework. The Reciprocal Mentoring programme has been launched and commenced in June 22 and is a vehicle for addressing inequality and discrimination.
	We have significantly increased the H&WB support for staff in recognition and appreciation of the efforts of staff. In June 22 we introduced a Staff Support Scheme which provided subsidised travel and food for staff. We further increased these subsidises in October and paid a £100 payment to support in November 22 to help with increased cost of living. These subsidies were continued in 23/24 and have been approved for 24/25.
	We have continued to focus on communication and thanking staff for their contributions.
Controls in place	The line management CCL Programme commenced in April 22. The purpose of this programme is to develop the skills of line managers to lead in a compassionate way.
	We have established a Resourcing and Retention Improvement Programme to provide a structured and systematic approach to working collaboratively on a range of projects to improve retention.
	The 23-25 Workforce Strategy has been approved by the Trust Board and the 24/25 workplan has been signed off. The workplan includes action to improve the quality of appraisals, updating of nursing job descriptions and review of bandings, development of nursing career pathways and improvements in talent management processes.
	A revised structure is being implemented in the Workforce Directorate which will include a dedicated team for talent management and career pathways.
	An improved process for collecting feedback from leavers is being implemented.
Risk Assessors recommended actions to further reduce the risk	To improve career pathways and development plans for staff to reduce the instances of staff having to leave to develop their careers. A revised structure is being implemented in the Workforce Directorate which will include a dedicated team for talent management and career pathways.
	Turnover rates are reported to the Trust Board monthly via PIPR and there are regular spotlights exploring trends.
Assurance	The quarterly pulse survey and the annual staff survey include questions on the intention of staff to stay with the organisation. These results are reported to the Workforce Committee and Trust Board.
7.0501.01102	The key driver for turnover is staff engagement. The pulse survey and the national staff survey both track a number of metrics related to staff engagement. The results of these surveys are reported to the Board and Workforce Committee.
	Trust Workforce Strategy includes a set of metrics and goals for measuring impact of the plans to reduce turnover.
Gaps in Assurance	We do not have good information and data from staff exit interviews. Improving this is in the 23/24 Workforce Action plan.
Levels of Assurance (182)	Adequate

Description	If the Trust is unable to attract and recruit staff to meet its workforce plan, as defined by the annual workforce planning process, then it will be unable to ensure safe staffing levels, maintain levels of activity required by the recovery plan, achieve the levels of income required by our financial plan, contain pay spend within budgeted levels and staff engagement, wellbeing and retention will be negativel impacted.
Controls in place	There is good joint working between the Communications team and the Recruitment team to ensure that all possible opportunities to promote career opportunities within the Trust are maximised that bespoke campaigns are designed for specific areas as necessary. Our Values are reflected in our adverts and recruitment process. There is an ICS supply group which the Trust is an active participant in. We are utilising overseas recruitment for registered nursing staff and AHP roles. We have increased the resources in the Nurse Recruitment and Retention team to support the recruitment and retention of HSCWs. The Trust Board reviews, at each Board, vacancy rates via PIPR. The Workforce Committee oversee the implementation of the Compassionate and Collective Leadership Programme and the Resourcing and Retention Improvement Programme.
	We have a programme of open events and attending external recruitment events. The Resourcing and Retention Improvement Programme aims to provide a structured and systematic approach to working collaborativel on a range of projects to improve recruitment. We have procured a new electronic recruitment system which has now been implemented and time to hire is starting to reduce. An overseas recruitment plan for 24/25 has been agreed. A Workforce Strategy has been approved by the Trust Board which describes the recruitment action plan.
Risk Assessors recommended actions to further reduce the risk	No additional recommendations noted
Assurance	Work with ICS partners to utilise educational and recruitment supply routes to meet projected demand and promote the NHS as the place to have a fulfilling and rewarding career Trust Workforce Strategy 2023-25 has been approved by the Trust Board which includes a 23/24 action plan and metrics Internal Monitoring • DWOD reports to Board on a monthly basis. The Workforce Committee has agreed regular reporting across: • Implementation of Compassionate and Collective Leadership Programme. • Implementation of the Workforce Strategy • Implementation of the Resourcing and Retention Programme • Development of networks to support our staff: BAME, LGBTQ+, Disability and Difference, Women's networks. • Annual monitoring of WRES and WDES data. • Annual review of our Gender Pay Gap report. • Workforce KPIs including vacancy rates are reported to Board through PIPR and reviewed monthly at Q&R and Performance Committees. External Assurance Measures: • Monitoring of our staff recommender score through the National Staff Survey (annual) with quarterly feedback through the Pulse survey. The output of the NHS Staff Survey is reviewed at a divisional and departmental level.
Gaps in Assurance	No gaps noted at present

Consequence (current)	Major - 4
Likelihood (current)	Likely - 4
Risk level (current)	Extreme Risk
Risk level (Target)	High Risk
Rating (current) Description	If there is no good staff engagement then staff turnover, recruitment, sickness absence, staff morale and team working will be negatively impacted. The evidence also shows that poor staff engagement negatively impacts on patient outcomes and experience and on confidence in the organisation and its financial performance.
Controls in place	The Compassionate and Collective Leadership Programme encompasses a number of workforce programmes to improve staff engagement and ensure a high care quality culture. In 2021 we launched revised values and a behaviour framework to support staff and leaders with role modelling the behaviour that engenders a compassionate and collective workplace culture. Workshops to embed this framework commenced Feb 22 and all staff are being encouraged to attend these. We have a number of support mechanisms in place to enable staff to work safely and to receive support for their health and wellbeing. We have implemented a Staff Support Scheme to support staff with the cost of transport and food. There is a monthly all staff briefing and weekly managers briefings to keep staff informed and provide the opportunity to recognise and appreciate the contribution of staff/teams. A weekly digital newsletter has been introduced which provides the opportunity to focus on particular items in more detail. The BME, LGBT, Womens and Disability Staff Networks provide the forum for proactively working with staff to improve engagement and inclusivity. The Reciprocal Mentoring Programme commenced in June 22 and a second cohort started in Sep 23. Good line management is an important aspect of building high staff engagement and the line managers development programme commenced in April 2022. One of the workstreams within the STA Improvement Programme, which has the lowest levels of staff engagement across the Divisions/Directorates is focused on improving culture and staff engagement across the departments within the division. The Workforce Strategy has been approved by the Trust Board and describes the approach to improving staff engagement and metrics for tracking progress. The Trust Board held development sessions in Dec 23 and March 24 to consider and review their strategic approach and leadership of EDI and culture. A further session took place in June 2024 to develop a vision for inclusive leadership and how this can be brought to life
Risk Assessors recommended actions to further reduce the risk	Support teams who are experiencing difficulties to improve and support a strong sense of belonging for all team members. Improve the quality of appraisals across the hospital.
Assurance	 Monitoring of our staff recommender score through the National Staff Survey (annual) with quarterly feedback through the Pulse survey. The output of the NHS Staff Survey is reviewed at a divisional and departmental level. 56% response rate to the 2023 NHS Staff Survey Monthly monitoring of compliance of staff with a current IPR at a departmental level with Trust wide reporting in PIPR. Weekly managers briefings held which ensure focus on issues raised by our staff using a 'you said we did' approach. Monthly All Staff briefings. Implementation of Compassionate and Collective Leadership Programme. Development of networks to support our staff: BAME, LGBTQ+, Disability and Difference, Women's networks. Annual monitoring of WRES and WDES data. Annual review of our Gender Pay Gap report. Implementation of the Reciprocal Mentoring Programme. Third cohort commencing Jan 25. Workforce Strategy approved by Trust Board and annual action plan. Vision for inclusive leadership and Leadership Behaviour Framework developed and launched.
Gaps in Assurance	We are below average against our peer group in all of the key themes in the NHS Staff survey 2023.
Levels of Assurance (182)	Adequate

Consequence (current)	Major - 4
Likelihood (current)	Possible - 3
Risk level (current)	High Risk
Risk level (Target) Rating (current)	High Risk 12
Description	IF the Trust does not achieve financial balance in the current year and beyond THEN the Trust (and ICS) will be subject to regulatory action which will impact on the Trust's ability to provide high quality, sustainable services to patients now and in the future.
Controls in place	Monthly reporting of cash, I&E and activity position through Performance Committee and Trust Board - Daily cash flow forecasting over rolling 12 month period - Part-block clinical income contracts with NHSE and key ICB partners - Activity recovery plans being implemented where necessary through operational and service teams. These plans are being monitored through Performance Committee - Cost investment controls through weekly vacancy control panel, monthly Investment Group and Performance Committee cycles - Long term financial modelling updates - Chief Finance and Commenrcial Officer (CFCO) - Trust working with specialised commissioning on future funding frameworks and strategy for NHSE - Potential for utilisation of non-recurrent financial recovery initiatives to support breakeven position - Current national funding mechanism is providing additional support through the Trust's fixed income arrangements to mitigate the 24/25 position - EPR replacement programme ongoing with business case process expected to clarify the financial implications as well as possible mitigations - Development of proposals for the growth of private care to support longer term financial sustainability - Strengthening of control environment for agency and temporary staffing - Number of linked actions in relation to industrial relations described under risk BAF 3261
Risk Assessors recommended actions to further reduce the risk	Greater clarity on the net cost impact of the EPR programme. This is expected following OBC and FBC completion. This may include securing additional funding to support the costs of the programme. Clarity on the funding envelope and framework for 2025/26 and beyond.
Assurance	First line / Second line: - Monthly reporting of cash, I&E and activity position through Performance Committee and Trust Board - Cash flow forecasting over rolling 12 month period - Part-block clinical income contracts with NHSE and key ICB partners - Activity recovery plans being implemented where necessary through operational and service teams. These plans are being monitored through Performance Committee and Divisional groups - Cost investment controls through weekly vacancy control panel, monthly Investment Group and Performance Committee cycles - Long term financial modelling updates - CFCO involvement in ICB Finance forum and risk mitigation - Trust working with specialised commissioning on future funding frameworks and strategy for NHSE - Potential for utilisation of non-recurrent financial recovery initiatives to support breakeven position in 2023/24 - National funding mechanism change in 2023/24 (non-recurrent) is providing additional support through the Trust's fixed income arrangements to mitigate the 23/24 position - EPR replacement programme ongoing with business case process expected to clarify the financial implications as well as possible mitigations - Updates on NHS Financial Regime provided to Performance Committee, Divisions and Board - Oversight of business planning process through Performance Committee and Board - Papers outlining proposal for the development of private care to support longer term financial sustainability - Enhanced design and operation of temporary staffing controls Third line: - External audit - Internal audit - review of key financial controls on an annual basis. Assurance over the design and effectiveness of controls through this report and reviewed by Audit Committee. - Feedback from NHSE
Gaps in Assurance	Macroeconomic environment, including supply constraints, potential for unfunded pay awards or material changes in banding profiles for registered nursing staff, inflation and pressure on public sector finances may lead to additional financial pressure above funded levels or reduction in funding available to Trust. Ability to control these largely outside Trust's direct control.
Levels of Assurance (182)	Adequate
BAF risks - Does this risk have an action plan on Datix? (179)	
Progress notes	[Harrison, Sophie - 09/12/2024] Risk remains high overall to reflect the levels of uncertainty in the financial framework, the material uncertainty associated with the financial impact of the EPR replacement programme and any funding, as well as the national picture over delegation of specialised commissioning. This is being balanced with the underlying surplus under the current framework and the forecast position for 24/25. On balance, the risk has been increased to reflect soft intelligence emerging around the financial framework for 2025/26 (and beyond) which suggests no growth funding and potential changes to the elective funding mechanism - details of which are yet to be published. These factors could impact on the Trust's medium term financial position and the residual consequence of any potential future deficit. This will continue to be assessed as the EPR works through OBC and FBC sign off.

BAF risks - Does this risk have an action plan on Datix? (179) No	
[Harrison, Sophie -09/12/2024] On balance the risk remains extreme given the underlying position of a number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position, there are material risks in the operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position, there are material risks in the operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position, there are material risks in the operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position, there are material risks in the operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position. The operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position. The operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position. The operating environment that are threatening this in the number of ICS partners in 2024/25. While the current 24, plan and forecast is a breakeven position remains major, both in terms of potential restrictions that would place on spend and regulatory intervention. This could mean requests for system funding re-distribution and could limit the ICS to secure capital incentive funding in 25/26 which is expected to be required to support RPH's medium term capital position.	nedium d be
The emerging intelligence on funding framework changes for 2025/26 are likely to add to the challenge for partners across the some the details are not yet formally published however we expect the system financial position to experience greater challenge going 2025/26. This will continue to be assessed as details are released.

Description	IF there are challenges in the supply of consumables or services THEN this could result in a failure to provide continuity of services, resulting in the inability to operate on patients.
Controls in place	Contracts are entered into the Atamis Contract register and a classification is entered based on the Government Commercial Function tiering tool. Additionally, a risk score is assigned to each contract to indicate the level of risk to the Trust based on criticality of supply, ease of change and size of supply market. This determines the level of contract management that the lead stakeholder will need to apply. For each new procurement cycle the Trust carries out a market review of the goods/services being delivered to determine the most appropriate strategy to apply to reduce the level of risk to the Trust. This may include splitting the contract in to multiple parts so that there is not a reliance on a single provider.
Risk Assessors recommended actions to further reduce the risk	An assessment to be completed in conjunction with clinical engineering and department leads to understand and document the relationship between equipment and consumables so that those that are locked together are documented. The new Supply Chain Manager will be tasked with monitoring all Important Customer Notices issued by NHS Supply Chain and reviewing these against the Trust's product portfolio to ensure mitigating steps can be taken prior to any impact on the Trust. Spot checks of department Business Continuity Plans to be carried out by Procurement for all Gold and Silver contracts with results recorded in the Atamis Contract Register to ensure steps are being taken to understand risks and put in place preventative measures.

Description	If the trust does not recover it's activity throughput and productivity to optimal levels then there is a risk that patients will wait extended periods for treatment, then this could cause patients' conditions to deteriorate, an increase in acuity, less positive patient outcomes, reputational impact and the financial stability of the trust and ICS could be adversely impacted.
Controls in place	An operational improvement plan (incorporated in to Flow Programme) has been developed to a deliver the following outcomes; Reduce length of stay and improve discharge profile. Improve theatre utilisation Reduce DNAs Assess capacity and demand Deliver alternative models of care. Increase day case utilisation. Ensure delivery of 23/24 operational plan. The programme will monitor progress against these objectives and report to the Performance Committee on a monthly basis. Activity delivered is monitored on a weekly basis against plan and 19/20 levels. Remedial action is identified proactively and escalated via the trust access meeting. STA CI programme focused on in day productivity (reporting via Performance Committee). Clinical Admin processes being reviewed re booking of theatre lists and closing down 2 weeks in advance with no cancellation 72 hours prior. PSI lists now embedded within the divisions. Dedicated operational support for cancer pathway.
Risk Assessors recommended actions to further reduce the risk	Reviewed by Execs and agreed that assurance can be moved up to adequate. This is because the systems and processes that we have in place should mitigate the risk, but that efforts are impacted by continued industrial action. The systems and governance that are in place are through the Flow Programme, weekly PTL, 642 and Access meetings. Industrial action and system bed pressures will affect ability to recover activity and the impact of IA is planned through the IA Group. IA is expected to continue in to Q4 2024 and beyond. System bed pressures are managed daily.
Assurance	Activity reports in month via the Patient Access meeting and via the Performance Committee. Performance is on plan for M4 except for IP elective activity where we are seeing the impact of industrial action (IA). In response we are looking at mitigations and to reset activity targets for the year in line with the update provided in BAF 678.
Gaps in Assurance	Workforce engagement and establishment levels as well as impact of Indutrial Action

Description	If industrial relations are negatively impacted as a result of discontent with national pay settlements and terms and conditions, including how the NHS Job Evaluation System operates, then this could lead to industrial action, low staff engagement, increased vacancies and turnover. A consequential reduction in workforce availability would impact our ability to provide services, increase access times for patients and have adverse financial implications.
Controls in place	We are liaising with local and regional Trade Union representatives to ensure effective lines of communication and exchange of information. - We have updated our protocols for managing industrial action and departments have updated their Business Continuity Plans. - The Trust established an Industrial Action Task Force to ensure that the organisation has a clear understanding of the impact of this action in each area and the actions needed to minimise the impact on services. - Activity recovery plans have been developed and a Patient Safety Initiative scheme has been implemented to incentivise staff to work additional hours to undertake additional activity out of normal hours of service. - May 24:A project to review and update registered nursing job descriptions and then the banding of roles has commenced. This will identify whether we have any roles incorrectly banded and provide the opportunity to determine whether we need to change the way we are deploying staff/our staffing model and/or managed the rebanding of roles. - The 24/25 pay award for AfC will be paid to AfC staff in the October payroll and November for Medical Staff - We are actively participating in developing a regional collaborative approach to addressing the risks linked to job evaluation and banding of roles.
Risk Assessors recommended actions to further reduce the risk	Capacity assessment for Job Evaluation and recommendations to increase capacity to be costed and presented to the Executive Team.
Assurance	Guidance for managers has been developed. An Industrial Action Taskforce chaired by the COO is established to ensure that the organisation has a clear understanding of the impact of this action in each area and the actions that are being taken to maintain services, and support decisions in relation to the reduction of services or redeployment of staff. Business Continuity Plans are in place. Elective Recovery Programme is in place and reporting to the Performance Committee. Review of nurse job descriptions and development of pathways underway in partnership with Trade Union colleagues which will report to the Workforce Committee. Working as part of regional HRD Network and with ICB partners to share best practice and identify areas of potential joint working.
Gaps in Assurance	Pay and terms and conditions are nationally set and a significant part of this lies outside of the control of the Trust. The national employee relations environment is not something within the control of the Trust but is determining the levels of discontent and challenge in relation to pay within NHS organisations.
Levels of Assurance (182)	Adequate

Rating (current) Description	16 If the CT reporting backlog does not improve back to the 4 week reporting KPI, then patient pathways will continue to be delayed whilst
Description	awaiting results ultimately resulting in potential patient harm
Controls in place	PACS Board re-initiated (now called Image Working Board) CT Backlog Operational Group initiated. Was meeting weekly. Then fortnightly. Now monthly via the COO Patient prioritisation across all divisions and specialties to ensure all patient reports are treated equitably Prioritisation given to reports for inpatients, clinically unwell or deteriorating patients and those on active cancer & RTT pathways. All other patients, including longterm surveillance patients, are prioritised in date order reporting the oldest first. Weekly reporting of backlog into Trust Access operational meeting Weekly reporting by email to the CT Backlog Group attendees Escalation into STA Division via monthly performance reporting Quarterly update into QRMG via quarterly reporting Locum shifts offered to medical staff to undertake additional reporting Confirmation of stats numbers by consultant are accurate to ensure monitoring, tracking and ensure all are meeting their job planned reporting quota. Numbers circulated fortnightly to the consultant team. Insourcing Company providing 4 radiologists to report on CTs ran between 20/1/24 and 31/3/24 to clear the backlog to within KPI. This succeeded with the simple CTs but still left quite significant waiting times for the complex reports. Reviewing reporting capacity against demand, identified the department is staffed to 2018/19 activity levels with no previous uplift until 2024 for the additional activity undertaken, further benchmarking underway to ascertain full activity gap between scanner activity and reporting time availability in the consultant team Further engagement with the Insourcing Company to commence 6/7/24 with 4 reporting shifts each weekend for 6 months, to be reviewed in September 2024, to support with covering the x4 consultant radiologist vacancies within the team.
Risk Assessors recommended actions to further reduce the risk	Full clinical engagement with any remedial plans for actioning the backlog as well as PACS Board and CT Backlog Operational Group.
Assurance	ED oversight and monthly reports to the Performance Committee Weekly reporting of backlog into CDC and Trust Access Escalation into STA Division
Gaps in Assurance	None at the moment

Description	If the Trust does not work effectively with its partners across the Cambridge Biomedical Campus, then this could result in missed opportunities to sustain and improve care for patients, both now and in the future. Failure to create capacity within the Trust and Campus partner organisations could result in failures to capitalise on opportunities to innovate and and support economic growth in life sciences in Cambridge and across the region. Ultimately this will impact on progression of strategic partnership working on the campus at a time where there is increased focus on leveraging the relationships between the two organisations.
Controls in place	Trust membership of CUHP. - Trust membership of CBC Ltd. CBC Strategy Group is undertaking public consultation on a vision for 2050, setting out how the Campus can bring together the right set of research, education, healthcare delivery and industry partners; and what opportunities and requirements this generates for transport and other infrastructure, people and skills. - Research and innovation recognised as priority within the Trust's Strategy with visibility at Board and Management Executive, regular reporting on progress against strategy. - Joint working with the University of Cambridge (UoC) to deliver new research infrastructure through the development and operation of the Victor Phillip Dahdaleh Heart and Lung Research Institute Clinical Research Facility (VPD-HLRI CRF). The Trust partners with the UoC through joint management groups and a joint strategic group to oversee the direction of the CRF, in support the Trust's wider research strategy. - Strategic partnership with CUH, governed through a Joint Strategic Board and Executive led sub groups / workstreams. Workstreams have been informed by an independent external reporting which outlined barriers to collaboration and areas for joint working. CUH and RPH programme managers supporting their respective executive teams meet every fortnight to review progress across both organisations regarding the six clinical pathways identified for collaboration. This remains a recurrent meeting to enable opportunities for informal discussions, escalations, and updates in order to facilitate and support clinical teams across both organisations to progress work. - Broadening partnerships with industry and the University. - Collaboration with UoC on Total Body Positron Emission Tomography (TB PET) bid. - Work starting with other trusts across the East of England on the specialist provider collaborative, focused on improving access to specialist care within the region, including exploring opportunities to collaborate on research and innovation.
Risk Assessors recommended actions to further reduce the risk	Further work with Campus neighbours to extend partnerships to new areas as part of wider CUHP and CBC vision, supporting Cambridge Life Science. Further work with CUH to progress clinical and non-clinical areas of collaboration, including decision on EPR and implications for joint programmes.
Assurance	Minutes of Joint CUH RPH Strategic Boards. Minutes, action logs, escalations from Joint Clinical Pathways Group feeding into Joint CUH RPH Strategic Board. Workstream reports part of Joint Strategy Board. - Regular updates to Board on CBC Ltd and CUHP. - Executives participating in CBC Ltd working group on Campus development proposals and appropriate ICS and regional NHS groups. - Joint strategy / management group with UoC re. VPD-HLRI / CRF. - External input / expertise from NHS, academic and industry partners to provide advice and challenge.
Gaps in Assurance	The capacity and commitment of partner organisations to make the most of our collective opportunities and how we jointly work through differences in priorities.
Levels of Assurance (182)	Adequate

Description	If the Trust does not fully adopt sustainable development approaches into its culture and all aspects of its operations, then it may not achieve its required contribution to NHS Net Zero, ultimately meaning that the Trust fails to fulfil its role to society and the community that it serves and that it will be insufficiently prepared to adapt to the impact of climate change upon the future patterns of healthcare and the physical environment in which the Trust must operate.
	Board approved Sustainability Strategy in place and subject to annual review by the Strategic Projects Committee. The Chief Executive is designated Board lead for sustainability and delivery of NHS Net Zero Targets.
Controls in place	A Green Plan has been established as the vehicle by which to undertake a programme of embedding sustainability into the organisation and is subject to annual review and update every three years.
Controls in place	A Sustainability Board has been established to oversee the programme of sustainability activities and specifically to monitor progress against the Green Plan. The Sustainability Board reports to the Performance Committee on a six-monthly basis.
	Updates on sustainability activities and progress are provided to the public via the Trust's annual report. Such updates are prepared in accordance with the requirements of the Taskforce on Climate-related Financial Disclosure (TCFD) as adopted for NHS annual accounting processes.
	Dedicated Environmental Officer/Sustainability Officer roles exist within the Estates and Facilities department.
Risk Assessors recommended actions	Progress regarding delivery of Green Plan actions will require regular review via the Sustainability Board, with additional assistance/resources identified as necessary to ensure national targets within the plan are delivered to timescale. Sustainability Board to be reconstituted to further enhance its programme oversight role; revised membership has been reviewed and approved by the
to further reduce the risk	Executive Committee.
	Further programme of engagement and training activities will be required, aided by recent re-establishment of a network of Green Champions.
Assurance	Sustainability Team lead on the activity to develop and support carbon reduction and net zero as per national targets. Green Plan (22-24) coming to an end with next version (25-27) in development. Workstream leads identified and in place to develop activity.
	Reporting to Sustainability Board, Performance Committee and Trust Board in relation to progress.e
	Governance, reporting and monitoring plans have been re-constituted and need to embed, alongside the preparation of the next Green Plan for beyond 2024.
Gaps in Assurance	Additional capacity and capability in preparation of plans. This includes review of the organisation's culture of sustainability and how this is embedded into every day practices.
	Corporate policies and other strategies (e.g. procurement, workforce, finance etc) require review to ensure alignment to environmental sustainability ambitions. To be undertaken as part of strategy refresh.
	Strategic review with PFI provider and other estate services of future plans for building enhancements and delivery of sustainability measures as part of future plans.
