 BAF Tracker Risks Below Risk Appetite

1. Executive summary

Purpose: The Board Assurance Framework (BAF) forms a part of the overall risk management and assurance process of the Trust and allows the Board to maintain oversight of the principal risks to delivery of the Trust's strategic objectives. All BAF risks are mapped to the Trust's strategic objectives and reporting is managed through the DATIX system and escalated through the relevant Trust Committee structures.

The BAF tracker report includes the Residual Risk Rating (RRR) and long-term trend for each BAF risk showing risks above Risk Appetite and within Appetite. Risks are mapped to the CQC Key Lines of Enquiry (KLOEs). All BAF risks are assigned to a Board Committee and Committee reports include further detail on controls and assurance for each risk.

Headlines: Sixteen risks have a Residual Risk Rating above Target.

New/Closed BAF Risks: BAF2833 Maintaining a safe and secure environment has closed and will be removed from the tracker in the next report.

Other updates:

BAF 3261: Industrial Action: RRR 20 (C4xL5): Following Board discussions the description of the risk has been revised to focus is on the impact of strike action on our ability to provide services. There are now mandates for strike action from a number of trade unions which will see further action at the Trust.

BAF1853: Staff turnover: RRR 20 (C5xL4): Resourcing and Retention Programme will provide a structured and systematic approach to working collaboratively on a range of projects to improve retention. The CCL programme continues focusing staff engagement and building a positive and compassionate culture.

BAF 858: Electronic Patient Record System: RRR16 (C4xL4): Following Committee review the EPR risk has been updated, with controls measures reviewed and restated with sub-risks established and linked to the record.

BAF 675: Health Care Acquired Infections: RRR 16 (C4xL4). Monthly ICPPC in place and SSI stakeholder meeting now chaired by DIPC. IPC environment rounds have increased and ANTT (Aseptic Non-Touch Technique) training data is at 95% across the surgical pathway. Report developed to track and report to ICPPC.

Principal Risks (PR) The Board has agreed the following principal risks to delivery of its strategic objectives which underpin the delivery of outstanding, safe and high-quality care:

PR1 Workforce: Failure to maintain a committed and skilled workforce in adequate numbers to support delivery of high-quality care, through staff that are aligned to our shared values, behaviours and purpose.

PR2 Productivity: Failure to achieve sufficient patient throughput to support timely and equitable access to care, and achieve financial stability, through optimising the productivity of our people and facilities.

PR3 Finances: Failure to deliver our financial plan on a sustainable basis addressing the underlying structural deficit and our contribution to the wider system through rigorous financial management and an effective response to uncertainties in the future mechanisms for commissioning and innovation in specialised services.

PR4 Cyber security and data loss: Failure to ensure that our services are as resilient as possible to ever present and escalating Cyber-attacks through the application of up-to-date cyber security controls, training, surveillance and early warning of potential threats, applying systems and management practices that ensure residual risks are mitigated appropriately.

Recommendation

The Board is requested to note the BAF report for February 2023.

NHS Foundation Trust

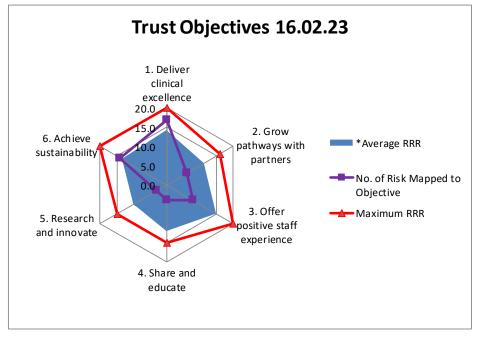

Royal Papworth Hospital
