# 1. Executive summary

**Purpose:** The Board Assurance Framework (BAF) forms a part of the overall risk management and assurance process of the Trust and allows the Board to maintain oversight of the principal risks to delivery of the Trust's strategic objectives.

**Principal Risks (PR)** The Board has agreed the following principal risks to delivery of its strategic objectives which underpin the delivery of outstanding, safe and high-quality care:

**PR1 Workforce:** Failure to maintain an engaged and skilled workforce in adequate numbers to support delivery of harm free care and positive patient experience, through staff that are well supported and aligned to our shared values, behaviours and purpose.

**PR2 Productivity:** Failure to achieve sufficient patient throughput to support timely and equitable access to care, and achieve financial stability, through optimising the productivity of our people and facilities.

**PR3 Finances:** Failure to deliver our financial plan on a sustainable basis and deliver our contribution to the wider system through rigorous financial management and an effective response to uncertainties in the future mechanisms for commissioning and innovation in specialised services.

**PR4 Cyber security and data loss:** Failure to prioritise cyber resilience through the implementation of up-to-date cyber security controls, training, surveillance, risk management, business continuity and recovery planning increases the risk of a major cyber event causing data loss, key system failure, and prolonged disruption to services.

#### Recommendation

The Board is requested to note and review the BAF report for August 2024.
