

Priority 7DS Clinical Standards

Clinical standard	Self-Assessment of Performance	Weekday	Weekend	Overall Score
<p>Clinical Standard 2: All emergency admissions must be seen and have a thorough clinical assessment by a suitable consultant as soon as possible but at the latest within 14 hours from the time of admission to hospital.</p>	<p>Overall proportion of patients seen and assessed by a suitable consultant within 14 hours of admission at Royal Papworth Hospital NHS Foundation Trust was 94%. Some of our patients can be admitted directly from the out patient clinic following assessment with a Consultant and therefore this can affect the time seen by a consultant subsequent to the out patient appointment. The Trust had 100% compliance at the weekend.</p>	<p>Yes, the standard is met for over 90% of patients admitted in an emergency</p>	<p>Yes, the standard is met for over 90% of patients admitted in an emergency</p>	<p>Standard Met</p>

Clinical standard	Self-Assessment of Performance	Weekday	Weekend	Overall Score
<p>Clinical Standard 5: Hospital inpatients must have scheduled seven-day access to diagnostic services, typically ultrasound, computerised tomography (CT), magnetic resonance imaging (MRI), echocardiography, endoscopy, and microbiology. Consultant-directed diagnostic tests and completed reporting will be available seven days a week:</p> <ul style="list-style-type: none"> • Within 1 hour for critical patients • Within 12 hour for urgent patients • Within 24 hour for non-urgent patients 	<p>Q: Are the following diagnostic tests and reporting always or usually available on site or off site by formal network arrangements for patients admitted as an emergency with critical and urgent clinical needs, in the appropriate timescales?</p>	<p>Microbiology</p> <p>Yes available on site</p>	<p>Yes available on site</p>	<p>Standard Met</p>
	<p>Computerised Tomography (CT)</p> <p>Yes available on site</p>	<p>Yes available on site</p>		
	<p>Ultrasound</p> <p>Yes available on site</p>	<p>Yes available on site</p>		
	<p>Echocardiography</p> <p>Yes available on site</p>	<p>Yes available on site</p>		
	<p>Magnetic Resonance Imaging (MRI)</p> <p>Yes available on site</p>	<p>Yes available on site</p>		
	<p>Upper GI endoscopy</p> <p>Yes mix of on site and off site by formal arrangement</p>	<p>Yes mix of on site and off site by formal arrangement</p>		
<p>All available on or off site as stated.</p>				

Clinical standard	Self-Assessment of Performance	Weekday	Weekend	Overall Score	
Clinical Standard 6: Hospital inpatients must have timely 24 hour access, seven days a week, to key consultant-directed interventions that meet the relevant specialty guidelines, either on-site or through formally agreed networked arrangements with clear written protocols.	Q: Do inpatients have 24-hour access to the following consultant directed interventions 7 days a week, either on site or via formal network arrangements?	Critical Care	Yes available on site	Yes available on site	Standard Met
		Interventional Radiology	Yes available off site via formal arrangement	Yes available off site via formal arrangement	
		Interventional Endoscopy	Yes available on site	Yes available on site	
		Emergency Surgery	Yes available off site via formal arrangement	Yes available off site via formal arrangement	
	Emergency surgery relates to general surgery in this category.	Emergency Renal Replacement Therapy	Yes available on site	Yes available on site	
		Urgent Radiotherapy	Yes available off site via formal arrangement	Yes available off site via formal arrangement	
		Stroke thrombolysis	Yes available on site	Yes available on site	
		Percutaneous Coronary Intervention	Yes available on site	Yes available on site	
		Cardiac Pacing	Yes available on site	Yes available on site	

Clinical standard	Self-Assessment of Performance	Weekday	Weekend	Overall Score
Clinical Standard 8: All patients with high dependency needs should be seen and reviewed by a consultant TWICE DAILY (including all acutely ill patients directly transferred and others who deteriorate). Once a clear pathway of care has been established, patients should be reviewed by a consultant at least ONCE EVERY 24 HOURS, seven days a week, unless it has been determined that this would not affect the patient's care pathway.	The Trust achieved 89% compliance with once daily review at the weekend. This was due to documented time of visit but no documented evidence of discussion with patient (2).	Once daily: Yes the standard is met for over 90% of patients admitted in an emergency	Once Daily: No the standard is not met for over 90% of patients admitted in an emergency	Standard Not Met
		Twice daily: Yes the standard is met for over 90% of patients admitted in an emergency	Twice daily: Yes the standard is met for over 90% of patients admitted in an emergency	

7DS Clinical Standards for Continuous Improvement

Self-Assessment of Performance against Clinical Standards 1, 3, 4, 7, 9 and 10					
The Trust's position has been stable since 2015 and compliance with the relevant standards.
