

Papworth Integrated Performance Report (PIPR) Summary version May 2020

June 2020

Reading guide

The Papworth Integrated Performance Report (PIPR) is designed to provide the Board with a balanced summary of the Trust's performance within all key areas of operation on a monthly basis. To achieve this, the Trust has identified the Board level Key Performance Indicators ("KPIs") within each category, which are considered to drive the overall performance of the Trust, which are contained within this report with performance assessed over time. The report highlights key areas of improvement or concern, enabling the Board to identify those areas that require the most consideration. As such, this report is not designed to replace the need for more detailed reporting on key areas of performance, and therefore detailed reporting will be provided to the Board to accompany the PIPR where requested by the Board or Executive Management, or where there is a significant performance challenge or concern.

- 'At a glance' section this includes a 'balanced scorecard' showing performance against those KPIs considered the most important measures of the Trust's performance as agreed by the Board. The second dashboard includes performance against those indicators set by the Trust's regulators and reported externally.
- Performance Summaries these provides a more detailed summary of key areas of performance improvement or concern for each of the categories included within the balanced score card (Transformation; Finance; Safe; Effective; Caring; Responsive; People, Management and Culture)

Key

KPI 'RAG'	Ratings
-----------	---------

The 'RAG' ratings for each of the individual KPIs included within this report are defined as follows:

Assessment rating	Description
Green	Performance meets or exceeds the set target with little risk of missing the target in future periods
Amber	Current performance is 1) Within 1% of the set target (above or below target) unless explicitly stated otherwise or 2) Performance trend analysis indicates that the Trust is at risk of missing the target in future periods
Red	The Trust is missing the target by more than 1% unless explicitly stated otherwise

Overall Scoring within a Category

Each category within the Balanced scorecard is given an overall RAG rating based on the rating of the KPIs within the category that appear on the balance scorecard (page 4).

- Red (10 points) = 2 or more red KPIs within the category
- Amber (5 points) = 1 red KPI rating within the category
- Green (1) = No reds and 1 amber or less within the category

Overall Report Scoring

- Red = 4 or more red KPI categories
- Amber = Up to 3 red categories
- Green = No reds and 3 or less amber

Trend graphs

Within the balanced scorecard, each KPI has a trend graph which summarises performance against target from April 2019 (where data is available)

Data Quality Indicator

The data quality ratings for each of the KPIs included within the 'at a glance' section of this report are defined as follows. It should be noted that the assessment for each of the reported KPI's is based on the views and judgement of the business owner for that KPI, and has not been subject to formal risk assessment, testing or validation. The Trust will consider development of a data quality assurance framework to provide greater clarity around quality of underlying data.

	Rating	Description
	5	High level of confidence in the quality of reported data. Data captured electronically in a reliable and auditable system and reported with limited manual manipulation with a full audit trail retained. Sufficient monitoring mechanisms in place to provide management insight over accuracy of reported data, supported by recent internal or external audits.
	4	High level of confidence in the quality or reported data, but limited formal mechanisms to provide assurance of completeness and accuracy of reported information.
	3	Moderate level of confidence in the quality of reported data, for example due to challenges within the processes to input or extract data such as considerable need for manual manipulation of information. These could effect the assurance of the reported figures but no significant known issues exist.
7	2	Lower level of confidence in the quality of reported data due to known or suspected issues, including the results of assurance activity including internal and external audits. These issues are likely to impact the completeness and accuracy of the reported data and therefore performance should be triangulated with other sources before being used to make decisions.
	1	Low level of confidence in the reported data due to known issues within the input, processing or reporting of that data. The issues are likely to have resulted in significant misstatement of the reported performance and therefore should not be used to make decisions.

Trust performance summary

A summary version of the PIPR has been produced for May 2020. This includes the latest dashboard KPI and additional KPI metric information but excludes the performance summary, key challenges and spotlight narratives. Whilst the maintenance of clinical, operational and financial control and stewardship of the Trust remains critical during the NHS response to COVID-19 routine reporting to Committees is currently constrained by the requirement to devote maximum operational effort and resources to the COVID-19 readiness and response. The reporting flexibilities exercised have been taken at the discretion of the Trust Executive.

Overall Trust rating - RED

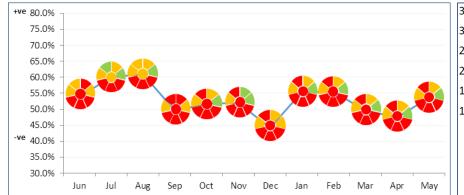

Context - The activity table and RTT waiting time curve below sets out the context for the operational performance of the Trust and should be used to support constructive challenge from the committee:

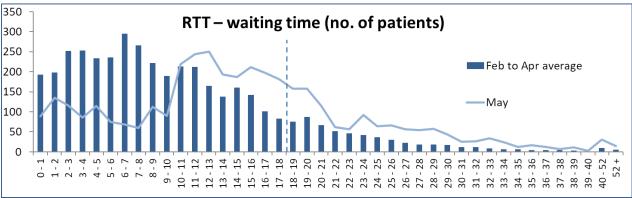

Inpatient Episodes	Dec-19	Jan-20	Feb-20	Mar- 20	Apr-20	May-20	Trend
